

Cleaning and assembling

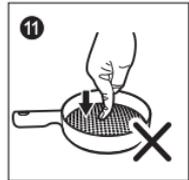

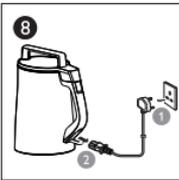

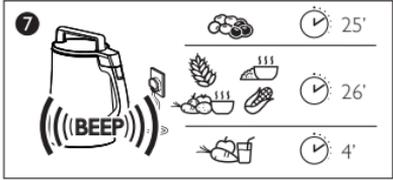

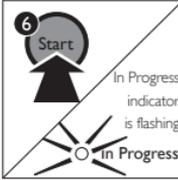

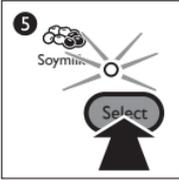

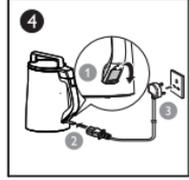

Cleaning before first use. Pour boiling water into the pot, and put the top unit into it. Then, soak for 10 minutes. Follow the Cleaning section in the user manual.

- Follow the operation steps in the user manual.
- Do not re-process or reheat cold soymilk with this soymilk maker. This is to avoid residues stick to the inner side of the pot.
- Make sure to take out the soymilk cup from the pot before use.

Making soy milk

! Caution

- Do not change the protruding direction of the filter. This special design optimizes the filtering effect.
