3 Before first use

Remove all packaging materials from the induction cooker.

Preparing for use

- Place the appliance on a dry, stable and level surface.
- Make sure there is at least 10cm free space around the appliance to prevent overheating.
- Always place the cookware on the cooking zone during cooking.
- Make sure you use cookware of the correct types and sizes (see the table below).

Recommended types and sizes of cookware

Material	Cookware with a bottom made of iron or magnetic stainless steel
Shape	Cookware with a flat bottom
Size	Cookware with a bottom diameter of 10-23cm, depending on the cooking mode

4 Using the induction cooker

There are seven cooking modes: Fry (Fry), Braise (Braise), Hot pot (Hot pot), Soup (Soup), Roast (Roast), Water (Water) and Steam (Steam).

- Follow the steps in "Preparing for use".
- Press the On/Off button (On/Off), the On/Off indicator lights up.

3 Press the Fry button (Fry) to cook with fry mode. Press the Menu button repeatedly (Menu) to choose the other cooking modes. The corresponding indicator lights up and the induction cooker starts working in the selected cooking mode.

- When the cooking is finished, press the On/Off button (On/Off) to switch off the appliance.
- Unplug the induction cooker after the fan stops working.

Note

- During cooking, you can change the power level by pressing the Increase (+) or Decrease (-) button.
- In Water (Water), Soup (Soup) and Steam (Steam) modes, the cooking power automatically changes for better cooking result.

Note

- After you have selected the cooking time, wait for a few seconds before the induction cooker automatically confirms it.
- After the time is set, you can press the Timer button (Timer) again to cancel the timer.

5 Cleaning

Unplug the appliance after the fan stops working and let it cool down. Clean the appliance with a damp cloth and, if necessary, with some mild cleaning agent.

6 Environment

Do not throw away the appliance with the normal household waste at the end of its life, but hand it in at an official collection point for recycling. By doing this, you help to preserve the environment.

7 Guarantee and service

If you need service or information or if you have a problem, please visit the Philips website at www.philips.com or contact the Philips Consumer Care Centre in your country (you will find its phone number in the worldwide guarantee leaflet). If there is no Consumer Care Centre in your country, go to your local Philips dealer.

8 Troubleshooting

If your induction cooker does not function properly or if the cooking quality is insufficient, consult the table below. If you are unable to solve the problem, contact a Philips service centre or the Consumer Care Centre in your country.

Problem	Solution
The On/Off button (On/Off) does not respond.	There is a connection problem. Check if the induction cooker is connected to the mains and if the plug is inserted firmly into the wall socket.
The appliance beeps continuously and then stops working.	You may have put unsuitable cookware on the cooking plate or you may have removed the cookware from the cooking plate during cooking. Make sure the cookware is made of steel, iron or aluminum with stainless steel cladding base and has a base diameter larger than 10cm. You may have placed the cookware outside of the cooking zone.
The cookware does not heat up to the required temperature.	The bottom of the cookware may not be flat. Use cookware with a flat bottom. If the problem still exists, take the appliance to your Philips dealer or a service center authorised by Philips.
The appliance stops working suddenly.	The temperature of the cookware might be too high. Let the cookware cool down for a while.
When I press one of the cooking mode buttons, the light of the selected mode does not go on.	The light is defective. Take the appliance to your Philips dealer or a service center authorised by Philips.
The fan works but the appliance has not started working.	You have to select a cooking mode after you have pressed the ON/OFF (On/Off) button.
Error code E0, E1, E2, E3, E4, E7, E8 or E9 is displayed on the screen.	The induction cooker has malfunction. Take the appliance to your Philips dealer or a service center authorised by Philips.
Error code E5 or E6 is displayed on the screen.	The voltage is either too high or too low. Check if the voltage in your home is suitable for the induction cooker.
